

# MAXPRO-BP™

## Quality Researched BIO PROTECTOR

Maintaining healthy environment in aquarium tank is a basic necessity. As circumstances responsible for creating anaerobic conditions like feeding & other treatments cannot be avoided, there is a dire need to control such situations. Eliminating toxic gases like ammonia, hydrogen sulfide, nitrites and other noxious gases by bio-degradation on a regular basis is an important aspect for healthy aquarium. Reducing of BOD & COD along with other organic wastes and preserving a proper balance is essential for creating a good environment for healthy growth and to improve pigmentation of Fish.

MAXPRO-BP is a scientifically formulated quality liquid pond conditioner that has been researched specially to remove harmful pollutants and detoxify the aquarium tank completely. MAXPRO-BP gives an unparalleled combination of new advanced aerobic & anaerobic micro-organisms in concentrated liquid form along with our proprietary MGP formula for distinctive effectiveness. Its unique blend of live beneficial microbes competes with harmful micro-organisms like *Vibrio* spp. for food and space, thus reducing its count drastically.

# MAXPRO-BP

Quality Researched BIO PROTECTOR

## BENEFITS:

- Reduces frequency of water exchange
- A powerful ammonia reducer
- Improves fish colour-pigmentation and survivability
- Keeps aquarium tank bottom clean by bio-degrading organic load
- Prevents sludge formation on tank wall, bottom and other objects in tank
- Maintains healthy environment by reducing BOD and increasing DO levels (oxygenation) in the tank

## COMPOSITION:

Concentrated blend of beneficial nitrifying Probiotic organisms

## DOSAGE:

Add 1 ml Maxpro-BP to every 5 litres of Aquarium water ( Marine / Sweet ) every 15 days

## Pack Size : 100 ml

- For Aquarium use only
- Keep away from children
- Shake well before use
- Store in Cool Place
