

VITAPRO AD₃

**A Revolutionary Blend of
Vitamin AD₃ & Probiotics**

वाइटाप्रो ए डी₃

गाय और भैसों की खुराक के लिए जरूरी
विटैमिन्स एवम् प्रोबायोटिक्स का अनोखा मिश्रण

Vitamins play a major role in continuance of normal growth and maintenance of life. Vitamins have their effectiveness in small dosages and are very vital for the transformation of energy besides regulating the metabolic processes. Vitamin A is vital for all forms of livestock as it is essential for the normal functioning of mucous membranes and many other biological processes, especially reproduction and growth besides lactation and vision. It also helps in developing resistance to infections, parasitic attacks as well as in fighting stress. Lack of availability of green fodder and good quality hay can result in deficiency of Vitamin A in cattle. Vitamin D₃ plays a vital role in proper deposition of calcium and phosphorous particularly in the development of skeleton during growth.

Research has shown that microbial colonization of the digestive tract is necessary for normal development and well being of livestock. They also help to synthesize Vitamins completely and make available the much-needed energy to the animals. Probiotic is a live microbial feed supplement, which beneficially affects the host animal by improving its intestinal microbial balance. Encouraging healthy rumen micro flora by probiotic supplementation ensures a more complete breakdown of vitamins and greater nutrition realization.

VITAPRO AD₃ is a revolutionary combination of special mineral stable powder, containing 50,000 IU of Vitamin A and 5000 IU of Vitamin D₃ per gm and 600 Billion CFU of viable Probiotic formula. This scientifically balanced blend is ideally suited for cattle nutrition when properly mixed in feed, to meet the much-required vitamin A & D₃ for all age groups.

BENEFITS:

- Improves growth & lowers mortality
- Helps to improve fertility & earlier return to heat after calving
- Acts as rumen modulator
- Increases milk yield with higher milk fat content
- Inhibits many potential disease causing pathogens
- Helps develop resistance to infections
- Helps to overcome stress
- Establishes & maintains healthy gut microflora
- Improves hair coats and keeps animals healthy

COMPOSITION:

Each gram of VITAPRO AD₃ contains minimum viable count of :

VITAMIN A : 50,000 I.U.

VITAMIN D₃ : 5,000 I.U.

MGP Probiotic Formula 425

DOSAGE:

Individual Animal	
Regular	Stress
5g / Day	10g / Day

In Feed	
Regular	Stress
100g / ton	200g / ton

MIXING GUIDE:

Prepare a premix by adding the recommended dosage of VITAPRO AD₃ in 5 kg feed. Mix this premix to the final quantity of feed.
